- your email, your mobile phone number,
- images if needed to support your query.

Hours are Monday – Friday (excluding bank holidays).

We aim to respond within 24 working hours, often sooner.

Assembly Instructions for Stability Bar

Video instructions can be found on our You Tube Channel <https://www.youtube.com/ReboundFitness>

Go to playlist called 'Product Details, Setting Up & How To Clips'

1. Remove two of the rubber caps from the legs of the rebounder – there are 6 legs so remove the caps from two legs leaving one leg in-between them, ideally either side of the leg closest to one of the hinges.
2. Then slide the leg of the stability bar over the two legs (the ones with the rubber cap removed)
3. Take the top of the stability bar (the handle) and the two straight bars (the one's with the holes in) and connect both to the top of the stability bar to create the top handle.
4. Now slide the handle and the straight bars into the stability bar legs and adjust to the required height before using the large side screws to tighten the stability bar in place.

5. Place the rubber caps back onto their respective legs and use the smaller leg screws to tighten the stability bar to the leg.
6. Maximus Life Ltd and Health2fitness Ltd assume no responsibility for any personal injury, loss or property damages or any liability that may arise from this product.

Health & Safety

The Health & Safety requirements for safe and effective use of the rebounder (used with this stability bar or without the bar) are detailed in the Instruction Manual relevant to that model.

Guarantee and Returns Policy

Health2Fitness Ltd and Maximus Life Ltd (T/A Rebound Fitness) aims to always provide high quality goods that are fault free and undamaged. On occasion however, goods may need to be returned, repaired or replaced. We use many different fulfilment companies and also fulfil via Amazon.
